Chisum BroncoXL

DRIVE ON, DRIVE OFF CAPABILITIES

Optional Drive Off Ramp available.

16 LIGHTWEIGHT REMOVABLE TREADWAYS

Allows technicians access to diagnose, measure, and visually inspect underbody damage.

Machine and milled surface designed to work with all Celette* fixtures, dedicated, universal, and the chameleon.

PULL TOWER

Chisum uses OTC Time Tested Hydraulic Pumps and Rams that offers an impressive 10 tons of pulling power. Capable of performing low, down, and high pulls, along with a true 360-degree pulling radius. Additional pull towers are also available.

CHAIN SLOTS

Our chain slots are strategically integrated into the main frame. Perfect for quick tie-downs. Ideal for pulling radiator supports, rear body panels, and much more.

GREASE FITTINGS

Chisum uses 10 industrial grade, high-quality, brass grease fittings to ensure longevity.

HAND HELD REMOTE CONTROL

Operate the Chisum Bronco XL effortlessly by the push of a button with our electric-hydraulic remote control.

DUAL HYDRAULICS LIFT RAMS

Lift Capacity of 8,800 lbs. Strong enough to handle most unibody and full size pick up trucks, vans, and suvs.

CHISUM TRUCK ANCHORING

Convenient and easy to move cart. Also to assist technicians when anchoring full frame vehicles.

4 POINT ANCHORING FOR UNIBODY

At Chisum we use high quality industrial grade hardware on our clamping systems.

FULL FRAME ANCHORING

Our standard anchoring system is rugged enough to add Chisum's truck anchoring systems.

THE NEW CHISUM WRANGLER

Our most popular anchoring system, easy to use, and not a lot of components. By incorporating heat treated stainless steel into our steel blend, this increases the gripping power needed to securely hold the frames being used on the vehicles of today.
